

Anthony Currie

Technical Support Specialist • IT Helpdesk • Cybersecurity Support
Chicago, IL • (773) 440-1375 • anthonycyber96@gmail.com

PROFILE

Technical Support Specialist with 7+ years of high-pressure systems troubleshooting, resolving 2,500+ live technical failures across MacOS, Windows, hardware, and multi-platform environments.

Operated under a strict 10-minute SLA supporting platinum-selling artists and major-label clients where downtime was unacceptable.

Backed by 1,500+ hours of cybersecurity training (Google Cybersecurity, IBM Cybersecurity Analyst, Harvard CS50) with deep system intuition and rapid root-cause detection.

Seeking roles in IT Helpdesk, Technical Support, or Cybersecurity Support.

CORE SKILLS

Technical Support: MacOS 10–12, Windows 10, OS Troubleshooting, System Configuration, Hardware Diagnostics, Latency/Signal Flow, CPU Optimization, Incident Triage

Cyber & IT: Python Automation, Linux Fundamentals, SIEM Foundations, Entra ID Basics, Traffic Analysis, Access Control, Log Review, Endpoint Analysis

Tools & Platforms: Pro Tools, Logic Pro, Adobe Creative Suite, Google Workspace, Jira, Zoom, Google Meet

Support Channels: Phone, Email, Text, Zoom, Google Meet, IG Direct Messaging

Strengths: Deep System Intuition, Instant Root-Cause Detection, Pressure-Proof Execution, High-Stakes Troubleshooting

EXPERIENCE

Technical Support Lead / Studio Systems Manager — Chicago, IL (2015–2022)

Resolved 2,500+ technical incidents across MacOS, DAWs, interfaces, hardware, and multi-system environments — zero escalations.

Maintained a strict 10-minute resolution window with a 100% recovery success rate.

Supported high-profile clients including Polo G, Jeremih, and multiple platinum-selling artists from major labels.

Managed 10+ weekly 2–4 hour sessions, maintaining continuous uptime with zero tolerance for failures.

Reduced CPU overload downtime with optimized templates, plugin load balancing, and offloaded storage workflows.

Diagnosed failures in signal flow, drivers, CPU performance, OS conflicts, plugins, and incompatible session builds.

Acted as the sole Tier 1–3 technician, responsible for troubleshooting, system maintenance, and operational stability.

Delivered 40+ hours/week of remote tech support across multiple channels.

Configured new Mac systems, installed software, managed updates, optimized performance, and stabilized workflows.

CYBERSECURITY & IT TRAINING

Google Cybersecurity Professional Certificate — 2024

IBM Cybersecurity Analyst Professional Certificate — 2024

Harvard CS50: Introduction to Computer Science & Python — 2023–2024

CompTIA Security+ — In Progress

Hands-On Practice (1,500+ Hours): Python automation, Linux systems, network traffic analysis, SIEM fundamentals, event log review, security monitoring, Entra ID configurations, endpoint troubleshooting.

ADDITIONAL STRENGTHS

Operated in environments where downtime = lost revenue, ensuring continuous system stability.

Strong pattern recognition from diagnosing constant multi-layer system failures.

Experience handling overnight shifts and 24/7 technical availability.

Comfortable working independently or remotely with no supervision.
